

HYDRAULIC POWER PACK , FOR DISCHARGE VALVE OF SEA WATER PUMP

HYDRAULIC POWER PACK, FOR DISCHARGE VALVE OF SEA WATER PUMP

- This power pack includes two Pump-Motor Units among which, one is Hot Standby Unit.
- Pump delivery is 19.8 Lpm @ 1740 rpm, Operating pressure is 250 bar.
- Main Actuator / Pump Control Manifold Block consist of various electrohydraulic valves which controls the actuator which in turns controls Discharge Valve of Sea Water Pump.
- Project cost INR 25 Millions.
